Identifiers-*Wisconsin

A comprehensive survey of the 63 schools in Wisconsin offering vocational, technical, and adult education courses in the 1967-68 school year was conducted to obtain a description of current programs. A total of 186,665 students were enrolled. Complete data were obtained on 34 schools. Some study highlights were: (1) New resident students constituted 51.5 percent of the total group, (2) 32.8 percent of the total state resident enrollment were in the 13 technical institutes, (3) Approximately three fourths of the total resident enrollment at vocational-technical schools were new resident students, (4) More than one half of the total number of students were 20 years of age or older, (5) The majority of the students a t the technical institutes came from the younger age groups, (6) A greater percentage of the students were enrolled full time in an associate degree and vocational diploma program than in college transfer programs, (7) Many students at the vocational, technical, and adult education schools traveled beyond a reasonable commuting distance to attend, and (8) Out-of-school enrollments were small in number. Included in the document are both narrative descriptions and tables classifying data by institutions and type of program. (DM)

January 1969

FOREWORD

This report is the result of a survey conducted by the Coordinating Council for Higher Education of the full-time and part-time students who enrolled in the fall of 1967 in the Wisconsin Schools of Vocational, Technical, and Adult Education. One of the projects funded under the U.S. Office of Education Facilities Comprehensive Planning grant, administered by the Wisconsin Higher Educational Aids Board, is projections of enrollment for the vocational-technical-adult schools. In order to make those projections, it is necessary to collect and analyze a sizable amount of background data. This report represents part of the data which are essential in making those projections. It represents the first attempt to collect and analyze data of this type from those schools and is the first comprehensive report available of the types of enrollments presented herein. The authors are indebted to the State Board of Vocational, Technical and Adult Education, and to the respective schools, for the completion of enrollment questionnaires on which the raw data were requested.

The Wisconsin system of Vocational, Technical, and Adult Education is considered to be one of the best in the nation. State legislation passed in 1965, upon recommendation of the State Board of these schools and the Coordinating Council, required that all areas of the state must be in vocational, technical, and adult education districts by July 1, 1970. This task nearly has been completed. Eighteen districts have been established (see Map I, page 2), although a few of the districts still remained to be completely organized as of July 1, 1968.

There were 63 schools in the Wisconsin Vocational, Technical, and Adult Education system in the 1967-68 year; these schools enrolled 186,665 students. The 63 schools vary in the type of programs they offer. They include those which are approved by the State Board of Vocational, Technical, and Adult Education to offer college transfer programs (Madison and Milwaukee only), accredited two-year programs leading to the associate degree, one- and two-year courses granting a vocational diploma, and apprenticeship programs. Others are special vocational programs on a part-time or full-time basis in the day, or in evening classes, which offer apprenticeship and job-upgrading programs, adult basic education courses, and other special classes.

The CCHE survey was of the 36 schools, which, at the time of the survey in the fall of 1967, were approved to offer college transfer, associate degree, or vocational diploma programs. All of them offered apprenticeship programs. The number of these schools varies from year to year as new courses are approved for schools, or, in some cases, as certain programs are dropped. Among the 36 schools in the CCHE survey, there are three types. There are two technical colleges: Madison Area Technical College and Milwaukee Technical College. They are approved to offer college transfer programs in addition to the associate degree, vocational diploma, and apprenticeship programs. The college transfer programs in both schools have been approved by the North Central Association.

Thirteen are technical institutes which are approved to offer two-year programs leading to the associate degree. They also offer approved vocational diploma and apprenticeship programs. These schools are located at:

Appleton
Eau Claire
Fond du Lac
Green Bay
Kenosha
La Crosse
Manitowoc
Oshkosh
Racine
Sheboygan
Superior
Waukesha
Wausau

Twenty-one schools in the group are vocational, technical, and adult education schools, which in this report are called vocational-technical schools. Nine of them, in the fall of 1967, had been approved to offer one- or two-year courses leading to the vocational diploma; all of them also offered approved apprenticeship programs. These schools are located at:

Beloit
Janesville
Menasha
Neenah
Rhinelander
Rice Lake
Stevens Point
Two Rivers
Wisconsin Rapids

By January 1968, the vocational diploma programs had been dropped at Menasha and Neenah; Wisconsin Rapids was authorized to grant the associate degree as well as the vocational diploma, and several other schools not in the survey could grant the vocational diploma in 1968--an example of the changes which can occur among the schools from year to year. But at the time of the survey in the fall of 1967, the nine schools listed above offered approved vocational diploma programs and apprenticeship programs.

Twelve of the 21 vocational-technical schools had approved apprenticeship programs in the fall of 1967, but no approved vocational diploma programs were offered. These schools are located in:

Ashland
Beaver Dam
Cudahy
Kaukauna
Marinette
Marshfield
Port Washington
South Milwaukee
Sturgeon Bay
Watertown
West Allis
West Bend

Since no data were received for the apprenticeship programs offered by Ashland and Port Washington, the two schools have been omitted from the report. Also lacking apprenticeship data were three more schools in the previous categories: Appleton, which also offers the associate degree and vocational diploma programs, and Menasha and Neenah, which at that time also offered vocational diploma programs. Since data were received for these programs at the three schools, those schools have been included in the report and the lack of their apprenticeship data has been noted in the tables. The total number of schools used in the report, therefore, is 34.

Data about the students were requested of the schools by sex, by full-time and part-time enrollments, and by age. Also requested were the dates of high school graduation of the students because a large portion of them enroll in the vocational, technical, and adult education schools some time after their high school graduation, even though it may be their first post-high school education experience. A serious problem occurred because some of the schools placed many of their students in the category of an "unknown" high school graduation date. These schools were Eau Claire, Janesville, Kenosha, Madison, Marshfield, Milwaukee, Waukesha, Wausau, and West Allis. The graduation dates of the students at Marshfield, Wausau, and West Allis could not be obtained.

The Coordinating Council appreciates the substantial effort made by the State Board of Vocational, Technical and Adult Education in securing such comprehensive data the first time a survey of this type was requested of them by the Council. It is hoped that in subsequent surveys, difficulties in obtaining these essential data will be overcome so that a substantially more useful report can be prepared for the State Board and the Coordinating Council.

HIGHLIGHTS

. . . In the fall of 1967, there was a total of 28,239 students of whom 27,946 were resident students in 34 vocational, technical, and adult education schools in Wisconsin which, among them, were approved by the State Board to offer college transfer, associate degree, vocational diploma, and/or apprenticeship programs.

New Students

. . . New resident students in the total enrollment totaled 14,393, or 51.5 per cent of the total group. There were 10,023 new student men (35.9% of the total enrollment), and 4,370 new student women (15.6% of the total).

. . . The Milwaukee Technical College enrolled 13,553 resident students in the fall of 1967, or 48.5 per cent of the total state enrollment. There were 5,106 new resident students at Milwaukee--37.7 per cent of the total resident enrollment at the College.

. . . The Madison Area Technical College had a total enrollment of 3,244 resident students; this was 11.6 per cent of the total state resident enrollment. A larger percentage of the total resident students at Madison was new students than was the percentage of the total students at Milwaukee--1,703, or 52.8 per cent of Madison's total resident enrollment.

. . . The 13 technical institutes, which offer approved associate degree, vocational diploma, and apprenticeship programs, enrolled a total of 9,164 resident students, or 32.8 per cent of the total state resident enrollment. Two-thirds of the technical institute students were new resident students--6,157, or 67.2 per cent of the total resident enrollment at the institutes.

. . . Among the technical institutes all, except Oshkosh and Racine, enrolled a large majority as new resident students. At Oshkosh, 294 resident students were new--48.3 per cent of the total of 609 resident students at that institute. Racine enrolled 454 new resident students--40.0 per cent of the total of 1,134 resident students there. In contrast, nearly four-fifths of the resident students at four of the technical institutes were new resident students: Fond du Lac (455, or 85.8%), Manitowoc (234, or 85.4%), Sheboygan (398, or 85.2%), and Waukesha (561, or 88.8%).

. . . At the vocational-technical schools, which offer approved vocational diploma and/or apprenticeship programs, approximately three-quarters of the total resident enrollment at the schools were new resident students. A total of 1,427 new resident students enrolled in these schools--71.2 per cent of the total of 2,005 resident students in the schools.

. . . Madison, Milwaukee, Kenosha, and La Crosse enrolled the largest numbers of new resident women students. Madison enrolled 625 new resident women students--36.7 per cent of its total new resident students (1,703); Milwaukee enrolled 1,664 new resident women students--32.6 per cent of the total of 5,106 new resident students there. Kenosha and La Crosse each enrolled 297 new resident women students; this was 38.0 per cent of the total new resident students at Kenosha (781), and 42.2 per cent of the total number at La Crosse (704).

. . . The vocational, technical, and adult education schools enrolled a large number of new students in the fall of 1967 who were graduated from high school prior to the 1966-67 school year. Of the 14,572 new students enrolled in the fall of 1967 (including 179 nonresidents), 6,156 of them, or 42.3 per cent, were known to be high school graduates of the 1966-67 school year. At least 39.2 per cent of the total new students, or 5,715, were known to have been graduated prior to 1966-67. The high school graduation date could not be obtained for 2,665 new students, or 18.3 per cent, and a very small percentage were not high school graduates.

. . . In the college transfer program at Madison and Milwaukee, 859 new students, or 58.8 per cent of the total of 1,461 new students in the program, were 1966-67 high school graduates. The remainder, 602 students, or 41.2 per cent of the total new students, were graduated prior to 1966-67.

. . . There were 2,517 new students in the associate degree program who were graduated from high school in 1966-67; this was 53.2 per cent of the total of 4,730 new students in the program. Another 1,496 new students, or 31.6 per cent of the total, were graduated prior to 1966-67, while 717, or 15.2 per cent of the total, had an unknown high school graduation date.

. . . There were 2,466 new students in the vocational diploma program who were graduated from high school in 1966-67; this was 51.8 per cent of the total of 4,763 in the program; 1,612, or 33.8 per cent, were graduated from high school earlier. There were 685 new students in the program, or 14.4 per cent, with an unknown high school graduation date.

. . . Apprenticeship programs had only 8.7 per cent of their new students who were 1966-67 high school graduates--314 of a total of 3,618 new students in the program; 2,005, or 55.4 per cent, were graduated from high school prior to 1966-67. A large number of apprentices had an unknown high school graduation date--1,263 new students, or 34.9 per cent of the total new apprentices; 36, or 1.0 per cent, were not high school graduates.

. . . About half of the new "college transfer" students at Madison were 1966-67 high school graduates--97, or 50.8 per cent of a total of 191 new students in the program. At Milwaukee, about 60.0 per cent of the new "college transfer" students, or 762 of a total of 1,270 new students, were graduates of the 1966-67 class.

. . . In the associate degree program, Madison enrolled 253 new students, or 74.4 per cent of a total of 340 in the program, who were 1966-67 high school graduates, as compared with 932 at Milwaukee, which was 61.9 per cent of a total of 1,505 new students in the program there.

. . . Madison enrolled 608 new students in the vocational diploma program, or 80.1 per cent of the 759 in that program, who were 1966-67 high school graduates. Milwaukee enrolled 405, or 31.9 per cent of a total of 1,272, in the program from the 1966-67 high school class, but 22.0 per cent, or 280, had an unknown high school graduation date at Milwaukee. There were 587 students at Milwaukee, or 46.1 per cent, who were known to have graduated prior to 1966-67.

. . . The high school graduation dates were not known for any of the 435 new apprentices at Madison. Milwaukee had 1,070 new apprentices, of whom 6.4 per cent, or 69, were 1966-67 high school graduates and 93.3 per cent, or 998, were graduated prior to 1966-67. Only three new students at Milwaukee had an unknown high school graduation date.

Total Enrollments

. . . Total enrollments at the 34 schools include new and continuing students whether resident or out-of-state students. A total of 28,239 students were enrolled in the fall of 1967. Of this total, 4,182, or 14.8 per cent, chose the college transfer programs at Madison and Milwaukee; 10,397, or 36.8 per cent, entered the associate degree program; 9,266, or 32.8 per cent, were in vocational diploma programs; and 4,394, or 15.6 per cent, were apprentices. Apprentices would total more if the students in apprenticeship programs at five of the schools had been obtained.

. . . Madison enrolled more students in the vocational diploma program than in any other program--1,755 students, or 53.7 per cent of the total of 3,268 students at the College. The 13,579 students at Milwaukee were more evenly distributed among college transfer (3,775, or 27.8%), associate degree (4,729, or 34.8%), and vocational diploma programs (4,005, or 29.5%); another 1,070, or 7.9 per cent, were apprentices at Milwaukee.

. . . At the 13 technical institutes, the majority enrolled in the associate degree programs--a total of 4,997 students, or 53.4 per cent of the total of 9,357 students in the institutes. Another 26.9 per cent, or 2,515 students, chose vocational diploma programs, and 19.7 per cent (1,845, omitting Appleton) were apprentices.

. . . Three of the technical institutes (Fond du Lac, La Crosse, and Superior) had more students enrolled in vocational diploma programs than in associate degree programs. Fond du Lac enrolled 196 vocational diploma students out of its total enrollment of 531 (36.9%); La Crosse enrolled 473 students, or 49.1 per cent of a total of 964 at the Institute, in vocational diploma work; and Superior enrolled 222 in the vocational diploma program, or 54.0 per cent of a total of 411 students there.

. . . More than half (14,981, or 53.4%) of the total number of students in the fall of 1967 (28,077*) were 20 years of age or over (including nonresidents). This was due to the pattern of age groups at the Milwaukee Technical College, which enrolled the largest number of students in the state in all programs and drew more students from an older age group than did Madison Area Technical College, the 13 technical institutes, or the vocational diploma programs at the vocational-technical schools.

. . . There were 4,132 students, or 14.7 per cent of the total of 28,077 students, who were 31 years of age or older. More than half of the 4,132 students in this age group enrolled in vocational diploma courses--53.3 per cent, or 2,201 students, as compared with 459 from the same age group in college transfer (11.1%) and 1,219 in associate degree work (29.5%).

. . . From the younger age groups, there were 5,392 students who were 18 years of age--19.2 per cent of the total of 28,077 students--and 4,430 who were 19, or 15.8 per cent. A smaller percentage, 6.7 per cent, or 1,887 students, were 17.

. . . A little more than half (1,675, or 51.3%) of the total of 3,268 students enrolled at the Madison Area Technical College were 17, 18, or 19 years of age. There were 1,572, or 48.1 per cent, who were 20 years of age or older.

. . . Madison drew a larger number of students from the 17-year old age group than from any other one age group, and was the only school among the 34 in the survey which did so. Madison enrolled 643 students who were 17 years old; this was 19.7 per cent of the total enrollment of 3,268 students there.

. . . The Milwaukee Technical College enrolled a much larger proportion of students aged 20 or over than did other schools in the survey. There were 8,369 students at Milwaukee aged 20 or older; this was 61.6 per cent of the total of 13,579 students at the Technical College. There were 4,105 students, or 30.2 per cent of the total, at Milwaukee who were 17, 18, or 19 years of age.

---

*Omitting students in associate degree and vocational diploma programs at Manitowoc, ages of whom were not provided.

. . . Milwaukee enrolled a large proportion of students who were 31 years of age or older. There were 2,672 students from this age group at Milwaukee, or 19.7 per cent of the College's total enrollment.

. . . The majority of the students at the technical institutes came from the younger age groups. There were 5,079 students, or 55.2 per cent of the total of 9,195 enrolled at the institutes, who were 17, 18, or 19 years of age.

. . . At Madison, the 13 technical institutes, and the vocational-technical schools, the apprenticeship program was the only program with a majority of students who were 20 years of age or older. The majority of students in each of the other programs offered by these schools were 17, 18, or 19 years of age. At the Milwaukee Technical College, the ages of the 1,070 apprentices could not be provided.

. . . A total of 8,205 women were enrolled in the 34 schools; this was 29.1 per cent of the total of 28,239 students (including nonresidents). More than half of the 8,205 women, or 4,177 (50.9%) enrolled in the vocational diploma programs. Another 17.9 per cent (1,465) of the total women students chose college transfer programs; 28.9 per cent (2,373) chose the associate degree programs; and 2.3 per cent (190) were apprentices.

. . . The largest number of men were enrolled in the associate degree programs, with 8,024 men in the program, or 40.1 per cent of the total of 20,034 male students in the schools (including nonresidents). Another 2,717, or 13.6 per cent, were in college transfer; 5,089, or 25.4 per cent, were in vocational diploma programs; and 4,204, or 21.0 per cent, were apprentices.

. . . Among the two colleges and 13 technical institutes, women outnumbered men only in vocational diploma programs at Madison, Fond du Lac, Green Bay, Kenosha, Racine, and Superior. Men outnumbered women in all of the Milwaukee Technical College programs, and in the associate degree programs offered by Madison and the 13 technical institutes.

. . . Full-time students accounted for 58.9 per cent of the total students enrolled in college transfer, associate degree, and vocational diploma programs. There were 23,845 students (including nonresidents) in the three programs (excluding apprenticeship programs), of whom 14,047 were full-time students and 9,798 were part-time students.

. . . The associate degree program offered by the two colleges and technical institutes enrolled 7,068 full-time students, or 68.0 per cent of the total of 10,397 in the program. The vocational diploma program enrolled 5,178 full-time students, or 55.9 per cent of the total of 9,266 in the program.

. . . A greater percentage of the students were enrolled full time in associate degree and vocational diploma programs than in college transfer programs. This is due to a high number and percentage of part-time college transfer students at the Milwaukee Technical College. Milwaukee enrolled 2,285 part-time students (60.5% of a total of 3,775 in the program) as compared with Madison which enrolled 311 full-time students of a total of 407 in the college transfer program, or 76.4 per cent.

. . . At the Madison Area Technical College, 1,994 students were enrolled full time, or 70.4 per cent of the total of 2,833 students in the three programs there. The Milwaukee Technical College had 36.9 per cent of its students enrolled full time; this was 4,613 students of a total of 12,509 taking the three programs at Milwaukee.

. . . All of the technical institutes except Racine had a large majority of their students enrolled full time, ranging from 72.9 per cent at Kenosha to 100 per cent at Wausau. At Racine, less than half the students were full time--48.4 per cent, or 374 students of a total of 773 enrolled in the three programs there.

. . . The majority of the students at the vocational-technical schools enrolled full time except at Rhinelander, which had 12 students of a total of 30 in the vocational diploma program enrolled full time (40.0%).

Geographic Distribution

. . . The 27,946 students from Wisconsin counties who enrolled in the 34 schools in the fall of 1967 represented every county in the state. Five counties each supplied more than 1,000 students; this was 63.1 per cent of the state total. These counties were: Dane (2,123), Kenosha (1,129), Milwaukee (12,037), Racine (1,240), and Waukesha (1,110). Milwaukee County alone contributed 43.1 per cent of the total state enrollment. Milwaukee and Dane counties offer a full complement of programs. Kenosha, Racine, and Waukesha each support a technical institute. In addition to the Milwaukee Technical College, Milwaukee County supports three schools which offer apprenticeship programs.

. . . Other counties which sent large numbers of students to the schools were Brown (486), Fond du Lac (445), La Crosse (490), Manitowoc (479), Marathon (534), Rock (449), Sheboygan (439), and Winnebago (543). All of the above counties support a technical institute offering three programs; in addition, Manitowoc, Outagamie, Rock, Winnebago, and Wood counties have schools which offer vocational diploma or apprenticeship programs.

. . . There were 47 counties in the state in which none of the 34 schools was located at the time of the survey. These counties sent a total of 3,824 students to schools located in other counties, or 13.7 per cent of the total enrollment in the state. Of the 3,824 students, 126 (3.3%) were in college transfer programs; 1,482 (38.8%) were in associate degree programs; 1,670 (43.7%) were in vocational diploma programs; and 546 (14.3%) were in apprenticeship work.

. . . Fourteen counties, in which none of the 34 schools was located, contributed 100 students or more: Calumet (107), Chippewa (232), Clark (118), Columbia (248), Dunn (109), Grant (140), Green (106), Monroe (139), Oconto (100), Ozaukee (232), Sauk (179), Shawano (120), Vernon (102), and Walworth (182).

. . . Forty-two counties provided a total of 4,154 students to the college transfer program located in Dane and Milwaukee counties. Dane and Milwaukee counties provided 89.6 per cent, or a total of 3,720 students. Approximately 60 students were residents of counties too far for reasonable commuting.

. . . More than half of the associate degree students, 58.1 per cent, or 5,958 of a total of 10,262 in the program, came from four southeastern counties: Kenosha (794), Milwaukee (3,814), Racine (845), and Waukesha (505).

. . . A small percentage of Dane County students enrolled in the associate degree program at Madison as compared with the vocational diploma program. There were 373 of the county's total of 2,123 students, or 17.6 per cent, in associate degree work at Madison, while 52.0 per cent, or 1,104 students, enrolled in the vocational diploma program at Madison.

. . . Approximately two-thirds (68.8%) of the total of 9,172 vocational diploma students were provided by 10 counties in the state: Dane (1,104), Douglas (169), Eau Claire (155), Kenosha (175), La Crosse (217), Manitowoc (176), Milwaukee (3,633), Rock (246), Waukesha (247), and Wood (188).

. . . Two counties in the state enrolled a major portion of their vocational-technical students in apprenticeship programs--Portage, which had 57 apprentices (54.3%) of a total of 105 students from the county, and Menominee, which had 23 apprentices (52.3%) of a total of 44 students from the county.

. . . Twelve counties provided nearly three-quarters of the total of 4,358 apprentices in the state: Brown (122), Dane (318), Fond du Lac (129), Kenosha (153), Manitowoc (148), Milwaukee (1,198), Racine (289), Rock (171), Sheboygan (153), Waukesha (180), Winnebago (137), and Wood (138).

. . . Five counties in the state support schools which offer apprenticeship programs only: Dodge, Door, Jefferson, Marinette, and Washington. Five more counties have schools which offer vocational diploma programs in addition to apprenticeship programs: Barron, Oneida, Portage, Rock, and Wood. There were 75 students from the 10 counties who enrolled in college transfer programs at Madison and Milwaukee, and 436 students who enrolled in associate degree programs not offered in their home counties. The five counties which offered apprenticeship work only sent 253 students elsewhere for vocational diploma programs. This was a total of 764 students from the 10 counties who sought other schools for the programs they wanted and which were not offered in their home counties.

. . . Although a large portion of the students from counties in which the two colleges and 13 technical institutes are located attended the schools in those counties, student representation was not confined to these counties alone. The schools at Madison, Milwaukee, and Wausau drew nearly a statewide representation of students in the fall of 1967, and many counties are represented at the Eau Claire, Green Bay, Kenosha, La Crosse, and Oshkosh schools.

. . . The school at Eau Claire is an exception among the 34 schools in the proportion of students enrolled from the home county and the proportion enrolled from other counties. Instead of enrolling its largest number of students from Eau Claire County, it enrolled only 34.7 per cent, or 366 students from that county. The largest number of students at Eau Claire came from other counties--688, or two-thirds of the total enrollment there. The larger part of the enrollments at other schools came from the counties where they were located.

. . . Many students at the vocational, technical, and adult education schools traveled beyond a reasonable commuting distance to attend the schools. A very conservative estimate, taken from the maps in Appendix D for the two technical colleges and the 13 technical institutes, is that approximately 1,100 students at the schools could not possibly have commuted from their homes. In reality, many more than these came from counties at a distance that commuting would create an undue hardship, and probably they did not commute. Several programs in the schools are highly specialized and require expensive equipment, so that perhaps only one or two schools in the state could offer them at the time of this survey. Some counties are quite remote from any of the schools. Area districting is a recent development not yet completed in the state. Since the tax base will be enlarged under this plan, it is likely that more programs can be offered by more schools in the future to enable students to attend schools closer to home.

. . . Out-of-state enrollments are small in number--a total of 293 in 17 of the 34 schools. There were 28 in the college transfer programs at Madison and Milwaukee, 135 in the associate degree programs, 94 in the vocational diploma programs, and 36 apprentices. Kenosha enrolled the largest number of out-of-state students, 78, most of whom enrolled in the school's associate degree program.

INTRODUCTION

The following is a report of the student enrollment in the fall of 1967 in 34 vocational, technical, and adult education schools in Wisconsin, which at that time were approved by the State Board of these schools to offer accredited college transfer programs (Madison Area and Milwaukee Technical Colleges only), and/or two-year programs leading to the associate degree, and/or one- and two-year programs leading to a vocational diploma. Approved apprenticeship programs were offered by all of the schools.

The data presented give for each of the schools the number of men and women new students[*], and the recency of the high school graduation dates of the new students in each of the programs. Also included are total student enrollments, the distribution of student ages by school and program, the distribution of the total men and women in each program, the distribution of the total full-time and part-time students in each program, and the geographic origin of the total students in each program. Reference is made to resident students who must require housing and to out-of-state students.

The 34 schools, as they are identified in the tables following and in the text, are divided into three types described in the "Foreword": technical colleges, the Madison Area and Milwaukee Technical Colleges which offer accredited college transfer, approved associate degree, vocational diploma, and apprenticeship programs; technical institutes, which offer approved associate degree, vocational diploma, and apprenticeship programs; and vocational-technical schools, which offer either approved vocational diploma and apprenticeship programs, or apprenticeship work only.

Map I of the state consists of an outline of the area districts and the location of the 34 schools included in the report.

---

[*] Never attended a college, university, or vocational, technical, or adult education program prior to the fall of 1967. Exception: 191 new freshmen at Madison Area Technical College and 1,270 new freshmen at Milwaukee Technical College in college transfer programs; a new freshman is defined as one who never enrolled previously at any college for credit toward a baccalaureate degree.

NEW STUDENTS

New Resident Students in College Transfer, Associate Degree, Vocational Diploma, and Apprenticeship Programs, Fall 1967

The number of new resident students enrolled in the 34 schools in the survey, and the percentage the new students are of the total resident enrollment in these schools is presented in Table I.

In the fall of 1967, there were 27,946 resident students out of a total enrollment of 28,239 in the 34 vocational, technical, and adult education schools in Wisconsin. The new resident students in the total enrollment numbered 14,393, or 51.5 per cent of the total group. There were 10,023 new resident student men (35.9% of the total), and 4,370 new resident student women (15.6% of the total). There also were 293 students from out of the state, 179 of whom were new students.

The two technical colleges at Madison and Milwaukee maintain the largest enrollments of the vocational, technical, and adult education schools in the state, and are the only ones which offer a college transfer program in addition to associate degree, vocational diploma, and apprenticeship programs. The Milwaukee Technical College enrolled 13,553 resident students in the fall of 1967, or 48.5 per cent of the total state resident enrollment in the 34 schools (27,946). New resident students at Milwaukee totaled 5,106, or 37.7 per cent of the total resident enrollment at the College (13,553). Madison Area Technical College had a total resident enrollment of 3,244 students in the fall of 1967, which was 11.6 per cent of the total state resident enrollment in the 34 schools. A larger percentage of the total resident students at Madison were new students than was the percentage of the total resident students at Milwaukee--1,703, which was 52.8 per cent of Madison's total resident enrollment (3,224).

The 13 technical institutes, which offer approved associate degree, vocational diploma, and apprenticeship programs, enrolled a total of 9,164 resident students, or 32.8 per cent of the state total of resident students. Two-thirds of the resident technical institute students were new--6,157, or 67.2 per cent of the total resident enrollment in the 13 institutes. New resident students were less than half of the total resident enrollments in only two of the technical institutes. Oshkosh enrolled 294 new resident students, which was 48.3 per cent of the total of 609 resident students at that institute; Racine had 454 new resident students, which was 40.0 per cent of the total of 1,134 resident students at that school. The remaining technical institutes enrolled a large proportion of their total resident

*Never attended a college, university, or vocational, technical, and adult education program prior to the fall of 1967. Exception: the 191 new freshmen at Madison Area Technical College and 1,270 new freshmen at Milwaukee Technical College in college transfer programs are defined as never previously enrolled at any college or university.

**Does not include enrollments in apprenticeship programs.

†Offers approved program for apprentices only. Other vocational-technical schools offer vocational diploma and apprenticeship programs.

enrollment as new students, particularly Fond du Lac (455, or 85.8%), Manitowoc (234, or 85.4%), Sheboygan (398, or 85.2%), and Waukesha (561, or 88.8%).

Approximately three-quarters of the total resident enrollment in the vocational-technical schools were new students, the schools which offer approved vocational diploma or apprentice programs, or both. A total of 1,427 new resident students enrolled in these schools; this was 71.2 per cent of the total of 2,005 resident students in the vocational-technical schools. In eight of these schools, all of the resident students were new students; it is probable that some of these programs were offered as approved programs for the first time in the fall of 1967.

A greater number of new women resident students enrolled in Madison Area and Milwaukee Technical Colleges than in the technical institutes and vocational-technical schools. There were 2,289 new resident women students at Madison and Milwaukee in the fall of 1967; this accounted for 33.6 per cent of the total number of new resident students at the two colleges (6,809). There were 1,716 new resident women students at the 13 technical institutes, or 27.9 per cent of the total new resident students (6,157) at the institutes, and 365 at the vocational-technical schools, or 25.6 per cent of the total new resident students at these schools (1,427). Following Madison and Milwaukee, Kenosha and La Crosse Technical Institutes enrolled the largest number of new resident women students with 297 each. This was 38.0 per cent of the total new resident students at Kenosha (781), and 42.2 per cent of the total number at La Crosse (704); this probably indicates that more programs suitable for women are available at these schools.

Recency of High School Graduation of New Students

An attempt to identify the high school graduation date of new students who enrolled in the vocational, technical, and adult education schools in the fall of 1967 was not entirely successful (See Table II). A substantial number fell into the category of an "unknown" high school graduation date; some of the schools did not have a record of this information for all of their students. One of the largest of the schools, Wausau, did not have the high school graduation dates for any of the 545 new students enrolled there (See Table IX in Appendix A).

Table II groups the total new students (resident and out-of-state) enrolled in the 34 schools in the survey according to their high school graduation dates and the programs in which they enrolled. The same information for each of the 34 schools can be found in Table IX in Appendix A.

TABLE II

RECENCY OF HIGH SCHOOL GRADUATION OF NEW COLLEGE TRANSFER, ASSOCIATE DEGREE, VOCATIONAL DIPLOMA, AND APPRENTICESHIP STUDENTS IN THE STATE, FALL 1967

Graduation Date	College Transfer		Associate Degree		Vocational Diploma		Apprenticeship*		Total	
	No.	%	No.	%	No.	%	No.	%	No.	%
1966-67	859	58.8	2,517	53.2	2,466	51.8	314	8.7	6,156	42.3
1965-66	156	10.7	525	11.1	521	10.9	343	9.5	1,545	10.6
Before 1965-66	446	30.5	971	20.5	1,091	22.9	1,662	45.9	4,170	28.6
Not H.S. Grad.	--	--	--	--	--	--	36	1.0	36	0.2
Unknown Date	--	--	717	15.2	685	14.4	1,263	34.9	2,665	18.3
TOTAL	1,461	100.0	4,730	100.0	4,763	100.0	3,618	100.0	14,572	100.0

*Apprenticeship data for Appleton, Ashland, Menasha, Neenah, and Port Washington were not available; therefore, the apprenticeship figures are lower than the total should be.

Of the 14,572 new students enrolled (resident and out-of-state) in the 34 schools in the fall of 1967, there were 6,156 of them, or 42.3 per cent, who were known to be high school graduates of the 1966-67 school year. Another 1,545 new students were known to have been graduated from high school in the 1965-66 school year; this was 10.6 per cent of the total enrollment of new students. The number who were graduated from high school before 1965-66 was 4,170, or 28.6 per cent of the total. The schools therefore enrolled a substantial number of students who had postponed their post-secondary education for one reason or another. At least 39.2 per cent of the total number of new students in the 34 schools were high school graduates prior to 1966-67--a total of 5,715 students. No doubt this proportion would be higher if the graduation dates were known for the 2,665 new students in the "unknown" classification; they accounted for 18.3 per cent of the total new student enrollment.

In three of the programs--college transfer, associate degree, and vocational diploma--the majority of the new students in each were high school graduates of the 1966-67 year. In the apprenticeship program, the majority were graduates before 1965-66. Only in the college transfer program, however, were the high school graduation dates known for all of the students, so that caution must be used in interpreting these figures. There were 859 college transfer students, 58.8 per cent of the total in the program (1,461), who were graduated from high school in 1966-67. Quite a large proportion of the college transfer students were graduates before

1966-67--41.2 per cent, or a total of 602 students. Further, there were 446 students, or 30.5 per cent, who were graduated from high school before 1965-66. The percentage of new students in the associate degree program who were 1966-67 high school graduates was 53.2 per cent (2,517) of the total of 4,730 in the program, while 31.6 per cent (1,496) were graduated prior to 1966-67. The percentage of new students in the vocational diploma program with a high school graduation date of 1966-67 was 51.8 per cent (2,466) of the total of 4,763 students in the program; 33.8 per cent (1,612) of the total were graduated from high school before 1966-67. Only 8.7 per cent of the students enrolled in apprenticeship programs were 1966-67 high school graduates--(314) of a total of 3,618 in the program, but 55.4 per cent (2,005) of the total were graduated from high school before 1966-67. A considerable proportion of apprentices were in the "unknown" high school graduation date classification, however--34.9 per cent, or 1,263 students.

Table IX in Appendix A gives the recency of high school graduation of students by individual school. Several of the schools have been able to identify the graduation dates of the majority of the new students they enrolled. Madison Area Technical College did not have the high school graduation dates for any of its 435 apprentices, but could provide the date of high school graduation for most of the new students in the other three programs. New college transfer students numbered 191 at Madison, 50.8 per cent of whom were 1966-67 high school graduates (97). Ninety-four new students, or 49.2 per cent, were graduated before 1966-67. At the Milwaukee Technical College, 60.0 per cent, or 762 of the total of 1,270 new students in the college transfer program, were 1966-67 high school graduates; 40.0 per cent, or 508 students, were graduated before 1966-67. In the associate degree program at Madison, 74.4 per cent, or 253 of the total of 340 new students in the program, were 1966-67 high school graduates as compared with 61.9 per cent, or 932 of the 1,505 in the program at Milwaukee. At Madison, 80.1 per cent, or 608 of the 759 new students in the vocational diploma program, were high school graduates in 1966-67; since too large a number of students in Milwaukee's vocational diploma were in the "unknown" classification (280, or 22.0%), the two colleges cannot be compared in regard to this program. Three-quarters of the new apprentices at Milwaukee, or 801 of a total of 1,070 in the program, were high school graduates before 1965-66; the graduation dates for all but three in the program were known at this institution.

Among the technical institutes, Kenosha and Wausau are the only ones which have a large proportion of new students with an "unknown" high school graduation date--

in the case of Wausau, all of the new students are in this classification. In the associate degree programs at the rest of the technical institutes, the following schools enrolled approximately three-quarters or more of their total new students in the program from the 1966-67 high school graduating class: Appleton, 79.7 per cent (102 of a total of 128); Eau Claire, 71.2 per cent (183 of a total of 257); Green Bay, 72.5 per cent (129 of a total of 178); Manitowoc, 71.0 per cent (44 of a total of 62); Oshkosh, 82.1 per cent (193 of a total of 235); and Superior, 71.6 per cent (58 of a total of 81). The proportion of 1966-67 high school graduates at Racine was 51.0 per cent, or 202 of a total of 396 new students in the associate degree program there; another 21.5 per cent (85) were graduated from high school in 1965-66 and 27.5 per cent (109) were graduated prior to 1965-66. The proportion of new students at Waukesha who were 1966-67 high school graduates and who were enrolled in the associate degree program was even less--34.3 per cent, or 74 out of a total of 216 students in the program. Exactly the same number and percentage were 1965-66 high school graduates as were 1966-67 high school graduates at Waukesha, while 29.1 per cent (63) were graduated prior to 1965-66.

In the vocational diploma programs at the institutes, three schools had a high proportion of 1966-67 high school graduates among their new students: Appleton, 81.1 per cent (73 of a total of 90); Eau Claire, 73.8 per cent (242 of a total of 328); and Racine, 93.3 per cent, but the latter institute enrolled a total of only 15 new students in the program. In vocational diploma work, other technical institutes enrolled a much smaller proportion of new students who were graduated from hig school in 1966-67. Fond du Lac enrolled 49.7 per cent (90 of a total of 181 new students) from the 1966-67 high school class, and also 49.7 per cent (90) who were graduated prior to 1966-67. Superior had 39.5 per cent (58 of a total of 147) in the program who were 1966-67 high school graduates, and 48.3 per cent (71) who were graduated before 1966-67. Waukesha enrolled 43.4 per cent (49 of a total of 113) from the 1966-67 class, and 46.9 per cent (53) who were graduated before 1966-67.

Among the new apprentices with known high school graduation dates at the individual institutes, a large majority (two-thirds or more) at Fond du Lac, Green Bay, Manitowoc, Oshkosh, Sheboygan, and Superior were high school graduates before 1965-66. At La Crosse, all 133 new apprentices were 1966-67 high school graduates. At Racine, there were only 43 new apprentices; 39.6 per cent of them (17) were graduated before 1965-66.

TOTAL STUDENTS

The remaining tables and maps in this report pertain to the total enrollment of students at the 34 vocational, technical, and adult education schools. The total enrollment is made up of both resident and out-of-state students, and of new and continuing students. Map II presents the total number of students enrolled in the 34 schools, who were provided by each county in the state. Each school is identified by a dot in the county of location; the area districts are outlined and numbered. Every county in the state provided students to the vocational, technical, and adult schools. Substantial numbers of enrollees at a particular school came from many counties rather remote from the school.

Table III gives the total enrollment by program in each of the schools. In the fall of 1967, a total of 28,239 students were enrolled in the 34 schools. Of this total, 4,182, or 14.8 per cent, chose the college transfer program at the Madison Area and Milwaukee Technical Colleges; 10,397, or 36.8 per cent, entered the associate degree programs; 9,266, or 32.8 per cent, were in vocational diploma programs; and 4,394, or 15.6 per cent, were apprentices. The number and percentage of apprentices would be higher if five of the schools had been able to provide data for their apprenticeship programs.

At the Madison Area Technical College more students enrolled in the vocational diploma program than in any other--1,755 students, or 53.7 per cent of the total of 3,268 students at the College. At the Milwaukee Technical College, the 13,579 students were more evenly distributed among college transfer (3,775, or 27.8%), associate degree (4,729, or 34.8%), and vocational diploma (4,005, or 29.5%) programs. Another 1,070 students, 7.9 per cent, were apprentices.

At the 13 technical institutes, the majority of the students enrolled in the associate degree programs--a total of 4,997 students, or 53.4 per cent of the total of 9,357 students in the institutes. Another 26.9 per cent, or 2,515 students, chose vocational diploma programs. The number of students in the apprenticeship programs at the institutes (omitting Appleton for which these data were not available) came to 1,845, or 19.7 per cent of the total students enrolled at those schools.

Among the individual institutes, only three (Fond du Lac, La Crosse, and Superior) had more students enrolled in vocational diploma programs than in associate degree programs. La Crosse enrolled 473 students, or 49.1 per cent of the total at the Institute (964) in the vocational diploma program; Superior enrolled

*Does not include enrollments in apprenticeship programs.

†Offers approved program for apprentices only.

222 in its vocational diploma program, or 54.0 per cent of the Institute's total students (411); and Fond du Lac enrolled 196 students in the vocational diploma program, or 36.9 per cent of a total of 531 students. Four of the 13 institutes in particular had a strong representation in associate degree programs: Kenosha with 75.4 per cent (992 of a total of 1,316); Oshkosh, 73.2 per cent (450) of a total enrollment of 615 students (only 14 students enrolled in vocational diploma programs at Oshkosh); Racine, 66.2 per cent (751 of a total of 1,134 students); and Wausau, 68.9 per cent (648 of a total of 941 students).

In regard to apprenticeship programs in the technical institutes, Racine enrolled the largest number of apprentices in the group, 361 students, but this number was only 31.8 per cent of the total enrollment of 1,134 students at Racine. Fewer apprenticeship students enrolled at Manitowoc (112) and Sheboygan (178), but they accounted for 40.9 per cent of the total enrollment at Manitowoc (274) and 44.5 per cent of the total enrollment at Sheboygan (400). Institutes with a small proportion of their total student enrollment in apprenticeship programs were Eau Claire, 15.5 per cent (163 of a total of 1,054); Kenosha, 5.5 per cent (72 of a total of 1,316); La Crosse, 13.8 per cent (133 of a total of 964); Superior, 14.4 per cent (59 of a total of 411); and Wausau, 10.8 per cent (102 of a total of 941).

Distribution of Ages by Type of School and by Program

The distribution of ages of the total students who enrolled in the programs offered by the 34 schools is presented in Tables IV, V, VI, and VII. Manitowoc, one of the 13 technical institutes, could not provide the ages of the students in the school's associate degree and vocational diploma programs. The total number of students in these two programs, therefore, will be less than the totals given in other tables.

Over half of the total number of students in the fall of 1967 were 20 years of age or over. This was largely due to the pattern of age groups at the Milwaukee Technical College, which drew more and a higher proportion of its students from older age groups than did Madison and the technical institutes. Among the total of 28,077 students (omitting the two Manitowoc programs) at the 34 schools, 14,981 of them, or 53.4 per cent, were 20 years of age or over. There were 4,132 students, or 14.7 per cent of the total, who were 31 years of age or over. More than half of the adults from the 31 and over age group enrolled in vocational diploma programs--53.3 per cent, or 2,201 of a total 4,132 in this age group, as compared with 459 from the same age group in college transfer (11.1%) and 1,219 in associate degree work (29.5%).

TOTAL	991	100.0	1,044	100.0	2,035	100.0

*Menasha and Neenah did not supply data for the apprenticeship programs.

From the younger age groups of 17, 18, and 19 years of age, there were 5,392 students who were 18 years of age; this was 19.2 per cent of the total of 28,077 in the 34 schools. There were 4,430 students, or 15.8 per cent, who were 19 years of age. A smaller percentage, 6.7 per cent, or 1,887 students, were 17 years of age.

Tables V, VI, and VII give the distribution of ages for the students enrolled at Madison and Milwaukee (Table V), the 13 technical institutes (Table VI), and the vocational-technical schools (Table VII).

Table V reveals the differences in age groups of students who enrolled at Madison and Milwaukee. A little more than half of the students who enrolled at Madison were 17, 18, and 19 years old. There were 1,675 students in this age group, or 51.3 per cent of the total of 3,268 students at Madison, while 1,572, or 48.1 per cent, were 20 years of age or over. Madison drew a larger number of students from the 17-year old age group than from any other one age group, and was the only school among the 34 in the survey which did so.* A total of 643 students at Madison were 17 years of age; this was 19.7 per cent of the total enrollment of 3,268 students at the Technical College.

The Milwaukee Technical College enrolled a much larger proportion of students who were 20 years of age or older than Madison did. There were 8,369 students at Milwaukee who were 20 years of age or over; this was 61.6 per cent of the total of 13,579 students at Milwaukee. There were 4,105 students, or 30.2 per cent, who were 17, 18, or 19. Milwaukee also enrolled a larger proportion of students than Madison did of persons who were 31 years of age or older. There were 2,672 students from this age group at Milwaukee, or 19.7 per cent of the school's total enrollment, as compared with 448 students at Madison, which was 13.7 per cent of Madison's total enrollment. It should be pointed out that none of the age data of Milwaukee's apprentices was provided--a total of 1,070 students. Where ages of apprentices were given by other schools, however, the vast majority were over 20 years of age. The apprentices at Madison, for instance, totaled 435, and only 65, or 14.9 per cent, were 17, 18, or 19 years of age.

The ages of the students in other programs at Madison and Milwaukee followed a similar pattern. In the college transfer program at Madison, 209 students were 17, 18, or 19 years of age; this was 51.4 per cent of the 407 students in the program. A lower percentage in the college transfer program at Milwaukee were in this age group--41.3 per cent, or 1,559 of the 3,775 students in the school's program.

---

*Space does not permit tables for each of the 34 schools. This statement was developed from original data in the CCHE office.

The contrast in age groups from which the two technical colleges drew students was more evident in associate degree and vocational diploma programs. Madison enrolled 471 students who were 17, 18, or 19 years of age in the associate degree program, or 70.2 per cent of the 671 students in the program, while Milwaukee enrolled 1,735 from this age group, or 36.7 per cent of the 4,729 Milwaukee students in the program. There were 930 students aged 17, 18, or 19 in the vocational diploma program at Madison, or 53.0 per cent of the total of 1,755 Madison students in the program. Milwaukee enrolled 811 students aged 17, 18, or 19 in the same program; this was only 20.2 per cent of the 4,005 students in vocational diploma work at Milwaukee. Milwaukee enrolled a larger number and proportion of students in vocational diploma courses who were 31 years of age or older than who were 17, 18, or 19 years of age. There were 1,480 students in the vocational diploma program aged 31 or older; this was 37.0 per cent of the total of 4,005 students taking this program at Milwaukee.

The majority of the students at the technical institutes came from the younger age groups of 17, 18, or 19-year olds (Table VI). There were 5,079 students at the technical institutes, or 55.2 per cent of the total of 9,195 enrolled in them, who were 17, 18, or 19 years of age. The ages of most of the apprentices at the technical institutes were provided. Those who enrolled as apprentices at the institutes were mainly from older age groups; 1,302 students, or 70.6 per cent of the total of 1,845 apprentices were known to be 20 years of age or older. There were 187, or 10.1 per cent, whose ages were unknown. In the associate degree programs at the institutes, 60.6 per cent, or 2,976 of the total of 4,911 in the program were 17, 18, or 19 years of age. In the vocational diploma program at the institutes, 71.6 per cent, or 1,747 of the total of 2,439 in the program, were 17, 18, or 19 years of age.

The number of apprentices (1,044) enrolled in the vocational-technical schools exceeded those who enrolled in the vocational diploma programs (991), but 10 of the 19 vocational-technical schools did not offer vocational diploma programs and all of them offered apprenticeship programs (Table VII). In the vocational diploma programs at the nine schools which offered them, 65.0 per cent (644) of the total of 991 students in the programs were 17, 18, or 19 years of age. There were 781 apprentices, or 74.8 per cent of the total of 1,044 in the apprenticeship programs, who were 20 years of age or older. The large number of apprentices and the high percentage of them in the older age groups brought the majority of the total number of students in the vocational-technical schools into the age group of 20 years of age or over. Fifty-seven apprentices, or 5.5 per cent, were in the unknown age category.

Enrollment of Men and Women by School and by Program

Table VIII gives the number of men and women in each program by school and the percentage women are of the total enrollment in each school.

A total of 8,205 women enrolled in the 34 schools; this was 29.1 per cent of the total enrollment of 28,239 students. Of the total number of students in the college transfer program (4,182), 35.0 per cent were women (1,465). A higher percentage of the total enrollment at the Madison Area Technical College was women (39.8%, or 1,300 of a total of 3,268) than was the percentage of women among the total enrollment at the Milwaukee Technical College (30.2%, or 4,100 of a total of 13,579). Of the 10,397 students in associate degree programs, 22.8 per cent (2,373) were women. Vocational diploma programs enrolled 9,266 students, of whom 45.1 per cent were women (4,177), while a very small percentage of women, 4.3 per cent (190), were apprentices of the 4,394 students in the program.

The largest number of women enrolled in the vocational diploma programs. Of the total of 8,205 women in the 34 schools, more than half of them (50.9%, or 4,177) chose the vocational diploma programs in the schools. Another 17.9 per cent (1,465) of the total women students entered college transfer programs; 28.9 per cent (2,373) were enrolled in the associate degree programs.

The largest number of men enrolled in the associate degree programs. There were 8,024 men in the program, or 40.1 per cent of the total male students in the 34 schools (20,034). The number of men in the associate degree programs nearly equaled the total number of women in the 34 schools (8,205). The distribution of the total number of men in the remaining three programs was 13.6 per cent, or 2,717, in college transfer; 25.4 per cent, or 5,089, in vocational diploma programs; and 21.0 per cent, or 4,204, in apprenticeship programs.

Among individual schools, women outnumbered men only in vocational diploma programs at Madison, Fond du Lac, Green Bay, Kenosha, Racine, and Superior (excluding vocational-technical schools). Madison enrolled 958 women in its vocational diploma program; this was 54.6 per cent of its total vocational diploma students (1,755). Fond du Lac enrolled 102 women, or 52.0 per cent of its total of 196 vocational diploma students; Green Bay enrolled 177 women, or 59.2 per cent of its

*Does not include apprenticeship enrollments.

†Offers approved program for apprentices only.

total of 299 students; Kenosha enrolled 173 women, or 68.7 per cent of its total of 252 students; Racine enrolled 13 women, or 59.1 per cent of its total of 22 students; and Superior enrolled 125 women, or 56.3 per cent of its total of 222 students in the vocational diploma program. La Crosse and Sheboygan had approximately an even distribution of men and women in their vocational diploma programs.

Men outnumbered women in all of the Milwaukee Technical College programs,and in the associate degree programs at Madison and at all 13 of the technical institutes. Superior had the highest percentage of women in associate degree work--44.6 per cent, or 58 women of a total of 130 students in the program. The lowest percentage of women in associate degree work were enrolled at Racine, Oshkosh, and Wausau. Racine enrolled 14.8 per cent (111 of a total of 751 students), Oshkosh 16.0 per cent (72 of a total of 450), and Wausau 18.7 per cent (121 of a total of 648).

These figures probably indicate that more courses suitable for women are available at the vocational diploma level than at the associate degree level. Perhaps additional programs should be offered for women in more of the schools to encourage them to attend.

Full-time and Part-time Students by School and by Program

Table IX gives the number of full-time and part-time students, and the percentage who are enrolled full time in the college transfer, associate degree, and vocational diploma programs. Ten of the 34 schools in the survey offer apprenticeship programs only and are not included in Table IX. The total student enrollments in Table IX, therefore, will not be the same as the total number of students in preceding tables.

There were 23,845 students in the schools which, among them, offered college transfer, associate degree, and vocational diploma programs in the fall of 1967. Of this total, 14,047 were full-time students, or 58.9 per cent of the total, and 9,798 were part-time students. More students in the college transfer program were part-time than full-time, while the reverse was true of the associate degree and vocational diploma programs. Among the 4,182 students in the college transfer program, 2,381 were part-time students, or 56.9 per cent of the total in the program. In the associate degree program, 7,068 students were full-time, or 68.0 per cent of the total in the program (10,397); in the vocational diploma program, 5,178 students were full-time, or 55.9 per cent of the total in the program (9,266).

*The 10 vocational-technical schools in the survey which offer apprenticeship programs only are not included in this table.

In regard to the higher percentage of part-time students in the college transfer program in the two technical colleges, it can be seen that the high proportion of part-time students is due to enrollments at the Milwaukee Technical College; 60.5 per cent, or 2,285 students of a total of 3,775 in the Milwaukee program were part-time. On the other hand, over three-quarters of the Madison college transfer students were full-time--76.4 per cent, or 311 of the total of 407 students in the program. Madison enrolled a much higher percentage of its students full time in each of the three programs than Milwaukee did. There were 650 students, or 96.9 per cent of Madison's 671 students enrolled full time in the associate degree program as compared with 47.6 per cent (2,251) of Milwaukee's 4,729 students in the associate degree program. In the vocational diploma program, Madison enrolled 58.9 per cent (1,033) of its total of 1,755 in the program as full-time students; Milwaukee had 21.8 per cent (872) of its total of 4,005 students as full-time students.

Of the total enrollments at the Madison Area Technical College in the three programs, 70.4 per cent were full-time students, or 1,994 out of a total of 2,833 students. The Milwaukee Technical College had 36.9 per cent enrolled full time, or 4,613 out of its total of 12,509 students in the three programs.

All of the 13 technical institutes had a high percentage of full-time student with the exception of Racine. Full-time and part-time students at Racine were divided almost equally. A total of 374 full-time students and 399 part-time students enrolled at the Racine Institute; full-time students were 48.4 per cent of the total of 773. Most of Racine's students were in the associate degree program with a fairly equal distribution between full-time (356) and part-time (395) students. Only 22 students enrolled in the vocational diploma program at Racine, 18 of whom were full-time students.

Wausau enrolled all 839 of its students in the two programs as full-time students. Kenosha enrolled 72.9 per cent (907) full time of a total of 1,244 students in the two programs. The remaining technical institutes enrolled a large majority as full-time students, ranging from 88.1 per cent (347 of a total of 394) at Waukesha to 98.3 per cent at Eau Claire (876 of a total of 891).

Full-time students in the vocational-technical schools also were in the large majority except at Rhinelander, which had 40.0 per cent (12) of a small total numb of students (30) enrolled full time.

County Origin of Wisconsin Students

The county origin of the total Wisconsin student enrollment in the 34 schools in the survey is presented in several tables and a series of maps. The maps and two of the more detailed tables are found in Appendices B, C, and D. In Appendix D is a map for each of the two technical colleges at Madison and Milwaukee and for the 13 technical institutes. Each school is located on the map and the area district in which each school lies is outlined on the map. The county distribution of students attending each school is given. Table XIV in Appendix B gives for each of the 34 schools the number of students at the school from the counties represented at the institution and the percentage they are of the total enrollment at each school; these are divided according to the four programs of college transfer, associate degree, vocational diploma, and apprenticeship. The number of out-of-state students also is given. Table XV in Appendix C lists for each county in Wisconsin the schools chosen by the students from the county, the number from each, and the programs in which they enrolled.

Table X, following, presents the number of students from each county in Wisconsin by program. Asterisked counties support one or more of the vocational, technical, and adult schools used in the survey.

The 27,946 students from Wisconsin counties who enrolled in the 34 schools in the fall of 1967 represented every county in the state. Five counties each provided more than 1,000 students, making a total contribution of 17,639 students, or 63.1 per cent of the state total. These counties and the number of students from each were: Dane (2,123), Kenosha (1,129), Milwaukee (12,037), Racine (1,240), and Waukesha (1,110). Milwaukee County alone contributed 43.1 per cent of the state enrollment; this reflects both the high concentration of population in that area and the location of the nationally known Milwaukee Technical College in the county.

Other counties which sent large numbers of students to the schools, ranging from 400 to 550 each, were: Brown (486), Fond du Lac (445), La Crosse (490), Manitowoc (479), Marathon (534), Rock (449), Sheboygan (439), and Winnebago (543). All of the above counties are in the more heavily populated areas of the state and support at least one school which offers the associate degree, vocational diploma, and apprenticeship programs; in the case of Dane and Milwaukee counties, a fourth program of college transfer work is offered. Five of the above counties support more than one school offering vocational or apprenticeship programs; these counties and the number of schools in them are: Manitowoc (2), Milwaukee (4), Outagamie (2), Rock (2), Winnebago (3), and Wood (2).

*Counties in which one or more of the 34 vocational-technical schools surveyed are located.

There were 47 counties in the state in which none of the 34 schools in the survey were located in the fall of 1967. These 47 counties sent a total of 3,824 students to schools located in other counties; this was 13.7 per cent of the total enrollment in the state. Of the 3,824 students, 126 (3.3%) were in college transfer programs; 1,482 (38.8%) were in associate degree programs; 1,670 (43.7%) were in vocational diploma programs; and 546 (14.3%) were in apprenticeship programs. Fourteen of the counties in which none of the 34 schools was located contributed 100 students or more: Calumet (107), Chippewa (232), Clark (118), Columbia (248), Dunn (109), Grant (140), Green (106), Monroe (139), Oconto (100), Ozaukee (232), Sauk (179), Shawano (120), Vernon (102), and Walworth (182).

County Origin of College Transfer Students

Forty-two counties provided a total of 4,154 students in the college transfer programs located at Madison and Milwaukee in Dane and Milwaukee counties, respectively. Of the total students in the college transfer programs, 89.6 per cent (3,720) came from Dane and Milwaukee counties. Approximately 60 students in college transfer programs were residents of counties too far from the technical colleges for reasonable commuting.

County Origin of Associate Degree Students

The largest number of students in the state were enrolled in the associate degree programs--a total of 10,262 students, or 36.7 per cent of the total Wisconsin enrollment in the 34 schools. More than half of the associate degree students (5,958, or 58.1%) came from four heavily populated southeastern counties: Kenosha (794), Milwaukee (3,814), Racine (845), and Waukesha (505). Counties with a major portion of their students in associate degree programs included Kenosha, 70.3 per cent (794 of a total of 1,129); Racine, 68.1 per cent (845 of a total of 1,240); Outagamie, 74.0 per cent (174 of a total of 370); Marathon, 64.6 per cent (345 of a total of 534); and Winnebago, 54.5 per cent (296 of a total of 543).

County Origin of Vocational Diploma Students

Dane County, which, next to Milwaukee County, contributed the largest number of students to the vocational, technical, and adult education schools in the state, also offers the associate degree at Madison, but only 17.6 per cent (373) of the county's total of 2,123 students enrolled in that program. The highest percentage of the Dane County students chose the vocational diploma program, 52.0 per cent, or 1,104 students. More than two-thirds (68.8%) of the total of 9,172 vocational diploma students in the state were from 10 counties: Dane (1,104), Douglas (169), Eau Claire (155), Kenosha (175), La Crosse (217), Manitowoc (176), Milwaukee (3,633), Rock (246), Waukesha (247), and Wood (188).

County Origin of Apprenticeship Students

Apprenticeship programs were offered by all of the 34 schools in the survey; only four counties in the state did not have students represented in the program: Ashland, Burnett, Florence, and Iron. It will be recalled, however, that five schools were unable to provide data concerning their apprenticeship students: Ashland, Appleton, Menasha, Neenah, and Port Washington. Some of the students from the four counties may have attended these schools as apprentices, particularly those from Ashland and Iron counties who would be close to the location of the Ashland school.

Two counties in the state enrolled a major portion of their vocational-technical-adult students in apprenticeship programs--Portage, which had 57 apprentices out of a total of 105 students, or 54.3 per cent; and Menominee, which had 23 apprentices out of a total of 44 students, or 52.3 per cent. Apprentices accounted for 15.6 per cent (4,358) of the total state enrollment in the 34 schools. Twelve counties in the state provided nearly three-quarters of the total number of apprentices (72.0%, or 3,136): Brown (122), Dane (318), Fond du Lac (129), Kenosha (153), Manitowoc (148), Milwaukee (1,198), Racine (289), Rock (171), Sheboygan (153), Waukesha (180), Winnebago (137), and Wood (138).

Enrollments in Programs Not Offered by Some Schools

As noted in the previous tables, there were nine vocational-technical schools in the fall of 1967 which offered approved vocational diploma and apprenticeship programs, and 10 vocational-technical schools which offered approved apprenticeship programs only. There were 10 counties in the state in which one or more of these schools was located and which supported no school offering the associate degree or college transfer programs. Apprenticeship programs only were offered by schools in five of the counties. It is interesting to note how many of the students from the 10 counties chose programs which were not offered to them in their home counties but who traveled elsewhere to enroll in them. This information is presented in Table XI.

TABLE XI

STUDENT ENROLLMENT FROM COUNTIES SUPPORTING SCHOOLS WHICH LACK A FULL COMPLEMENT OF PROGRAMS, FALL 1967

County	College Transfer	Associate Degree	Vocational Diploma	Apprenticeship	Total
Barron (1 school)	--*	16*	106	17	139
Dodge (1 school)	8*	89*	105*	71	273
Door (1 school)	2*	35*	23*	9	69

Total in Programs Offered in County	--	--	596	648	1,244
TOTAL	75	436	849	648	2,008

*Denotes enrollment in programs not offered in the county.

Of the 2,008 students who were residents of the 10 counties, 764 of them, or 38.0 per cent, enrolled in programs not offered by the schools located in their counties. The associate degree program attracted the largest number of the students who enrolled elsewhere, a total of 436 students.

Five of the counties offered only approved apprenticeship programs--Dodge, Door, Jefferson, Marinette, and Washington counties. The majority of the students from these counties enrolled in college transfer, associate degree, and vocational diploma programs. Table XV in Appendix C reveals that most of the Dodge County students in associate degree programs chose the schools at Fond du Lac, Madison, Milwaukee, and Oshkosh; all but one in the vocational diploma program enrolled at Fond du Lac, Madison, or Milwaukee. The associate degree and vocational diploma programs at Green Bay and Milwaukee were chosen by students from Door County. Jefferson County students enrolled at Madison and Milwaukee for the programs they did not have in the county; Marinette County students favored Green Bay, Milwaukee, and Oshkosh. Washington County sent all of its 32 college transfer students, 76 of its 87 associate degree students, and 39 of its 55 vocational diploma students to Milwaukee.

Rock County supported two schools, both of which offered the vocational diploma and apprenticeship programs. The majority of the students from Rock County, 417 of a total of 449, chose these programs; very few enrolled in college transfer and associate degree programs (32). Table XV in Appendix C shows that most of the Rock County students made use of their own schools, a total of 365 of the 417 in the two programs.

Commuting Students and Students Requiring Housing

Some programs in the vocational, technical, and adult education schools are highly specialized and require expensive equipment; therefore, these programs probably can be offered in a small number of schools only--perhaps one or two can offer such specialized programs. A student may have to travel some distance to enroll in a special program even though a school may be located near his home. As is the case with the public and private colleges, some areas of the state are more remote from schools of a particular type than are others. These factors undoubtedly contribute to the number of students who enroll in schools far beyond a reasonable commuting distance from their homes. A very conservative estimate of the number who must have found it necessary to find housing at the locations of the two technical colleges and the 13 technical institutes would be in the neighborhood of 1,100 students. Undoubtedly many more than these do not commute.

The series of maps in Appendix D give a graphic presentation of the distances students travel to many of the vocational, technical, and adult education schools in the survey. Although it is evident that a large portion of students attended a school in the county of their residence, student representation is not confined to these counties alone. This is particularly true of the schools at Madison, Milwaukee, Eau Claire, Green Bay, Kenosha, La Crosse, Oshkosh, and Wausau. Madison, Milwaukee, and Wausau drew nearly a statewide representation of students in the fall of 1967.

The maps not only give a good indication of the number of students who enrolled in schools away from their home counties, but also beyond the boundaries of their area districts. An example is Grant County, which at the time of the survey did not have a school with approved programs in the area district in which it is located; there was an evening school at Prairie du Chien, however. Table XV in Appendix C reveals that the 140 students from Grant County were enrolled at schools in Madison, La Crosse, Milwaukee, and Oshkosh. The schools nearest to Grant County are Madison and La Crosse. Madison is more than 50 miles from the border of Grant County; La Crosse is more than 60 miles. Either the Grant County students commuted a considerable distance from their homes to attend school, or they had to find housing. Although nearly two-thirds of the students from Columbia County attended Madison, in adjacent Dane County, and presumably many of them were commuters, approximately 75 more from Columbia County enrolled in schools obviously too far away to commute without undue hardship. Sixty-five students enrolled at Milwaukee, which is approximately 80 miles from the nearest town in Columbia County. Although 65 students alone could be absorbed by a city the size of Milwaukee, the map for the Milwaukee Technical College shows that a substantial number of students from other counties also would have needed housing in Milwaukee--at least 450 would have found it mandatory. Many similar examples can be found in Table XV and on the maps. Area districting is a recent development and not yet completed in the state. Since the tax base for the schools will be enlarged by this plan, it is likely that more of them will be able to improve and supplement their present programs to enable more students in the future to attend schools closer to home.

Table XIV (Appendix B) presents each school and the counties from which each school drew students by program. Invariably, the largest number of students who enrolled in a school came from the county in which the school was located, ranging from more than half to four-fifths of the total number of students at the schools. A notable exception was Eau Claire, which enrolled 34.7 per cent, or 366 students from Eau Claire County out of a total of 1,054 students at the school. Table XI reveals that most of the students from Eau Claire County attended the school in Eau Claire--366 of a total of 382 from the county, but the school also attracted 688 students from other counties in Wisconsin--two-thirds of the total enrollment.

Out-of-State Enrollments

Table XIV also gives out-of-state enrollment figures for the 34 vocational, technical, and adult education schools. There were 293 students in 17 of the schools in the fall of 1967 who came from other states than Wisconsin. Twenty-eight were in the college transfer programs at Madison and Milwaukee, or 9.6 per cent of the total out-of-state students; 135 enrolled in the associate degree programs, or 46.1 per cent of the out-of-state students; 94 enrolled in the vocational diploma program, or 32.1 per cent; and 36 enrolled as apprentices, or 12.3 per cent of the total students from out of the state.

The majority of the out-of-state students, 89.8 per cent (263) of the total of 293, enrolled at seven of the schools: Beloit (21), Kenosha (78), La Crosse (57), Madison (44), Milwaukee (26), Superior (23), and Waukesha (14). The largest number of out-of-state students in any one school was 78 enrolled at Kenosha; 66 of the 78 students were in the associate degree program. Table XII presents the breakdown by school and by program of the number of out-of-state students in the 17 schools which enrolled them.

[*] Never attended a college, university, or vocational-technical program prior to the fall of 1967. Exception: definition of 191 new freshmen at the Madison Area Technical College and 1,270 new freshmen at the Milwaukee Technical College in college transfer programs: those who never previously enrolled at any college for credit toward a baccalaureate degree.

[†] Offers approved program for apprentices only.
